

# Engineered Products & Services for Critical Fluid Management

## OUR PRODUCTS

### PUMPS

Pumps are a critical piece of sanitary process equipment in the pharmaceutical processing, beverage manufacturing, food processing, and cosmetics manufacturing industries. Whether you need assurance of a hygienic operation or an economical solution, our stainless steel, and disposable pumps dependably drive production in any sanitary processing application.

### CUSTOM FABRICATION

Hygeniks meets the demanding needs of today's high purity installers and end-users. Complete with all the capabilities of a high purity fabrication facility, we can quickly provide a wide variety of complex custom fabrications that meet the strict requirements of today's high purity industry, which includes ASME BPE, cGMP, CE, and FDA.

### FITTINGS

Hygeniks manufactures a complete line of hygienic fittings with several connection options and in a variety of materials, including 316L stainless steel, AL-6XN® alloy, and Hastelloy® C-22®. Our stainless steel fittings are precision machined, resulting in trusted hygienic performance in the pharmaceutical manufacturing, food and beverage, and cosmetic industries.

### SINGLE-USE SOLUTIONS

Hygeniks provides single-use solutions that are customized to the needs of our customers. Available in multiple high-grade materials, these assemblies are designed to accommodate the needs of different biomanufacturing processes. Single-use assemblies increase efficiency, eliminate cleaning, and reduce downtime.

### SYSTEMS

Hygeniks ships skid-mounted process systems on time, on budget, pre-tested, and ready for utility hook-up to avoid costly downtime. Plus, our project managers offer technical support throughout each stage of your process system project. Our skid design includes systems for traditional processing applications, large modular "super skids" and upstream and downstream suites.

### ALLOYS

As a leading supplier of super-austenitic AL-6XN alloy and Hastelloy C-22 fittings and tubing, Hygeniks provides the technical expertise and resources to supply, fabricate and deliver corrosion-resistant process materials. We also design and fabricate custom items in our state-of-the-art facility to accommodate unique process demands, from the very simple to the most complex.
